WIPES WITH A DIFFERENCE

UNIQUE WIPE MATERIALS

**WIPES WITH A DIFFERENCE****But WHY are they different?**

The Dirteeze range of wipers is built on passion! Products have been developed not by following others, rather leading the way in developing the best solutions for the wiping tasks in hand!

Dirteeze Wet Wipes use unique substrates blended with clever lotions, all products presented in eye-catching packaging. Dirteeze Non-Woven Wipes use innovative fibre composition for optimum wiping performance and offer product solutions for rag replacements to technical process wiping, all products presented in colour-coded boxes to help simplify product selection.

"Dirteeze unique substrates include a micro-beaded agitation technology for increased cleaning power without scratching surfaces."

## TRADE RANGE

The Dirteeze wet wipes range has at its core the base material "Spunlace", a soft strong and mainly biodegradable material designed to release the pre-moistened lotions when required, at the same time as lifting liquid and grime to finish off the clean.

Compare this to the vast majority of industrial wet wipes available in the marketplace today, derived from "Polypropylene", that exhibit the tendency for lotions to sit on the surface of the wipe, rendering them less effective, and simply pushing around liquids or grime, resulting in frustration by the user, and taking longer to complete the wiping task.

## FOR DISTRIBUTORS

- A best in category quality range of both wet and dry products
- Eye-catching retail packaging
- Competitive pricing
- Technical support
- Re-seller package comprising of merchandisers, point-of-sale displays, brochures, sales and marketing support
